SKILLS

► Mobile & Web QA

- Executed **End-to-end Black-box testing** on 50+ iOS & Android applications across multiple domains
- **Cross-browser testing** for many web platforms (Banking, E-commerce, etc.)
- **Cross-device testing** on iOS and Android app for **Version compatibility validation**
- Strong experience in **Manual Testing** (Functional, Regression, Smoke, Sanity & UAT) with a **Critical thinking-driven approach**
- App Store & Play Store compliance validation
- High-precision **UI/UX validation Using Figma Mirroring**

► Automation, API & Load Testing:

- Web Automation using **Selenium**, **Playwright**
- Mobile App Automation using **Appium** **Both Android and iOS**
- API testing using **Postman**
- Load & Performance testing (**JMeter**)
- Data Validation testing using **MySQL**, **PostgreSQL**

► QA Leadership & Process

- **Test strategy & test planning**
- **Test case design & execution**
- Root cause analysis, Risk analysis & release readiness reporting
- **Agile / Scrum collaboration**

► Tools & Platforms:

- **Jira**, Azure DevOps, TestFlight
- **GitHub**, CI/CD workflows
- **QASE**, WebRTC , **TestTim** , **Figma**, **GPT**, **XCode** , **Android Studio**

PROFILE

Passionate Software Quality Assurance Engineer with **6+ years of experience** across **iOS, Android, and Web platforms**. Currently leading QA for **30+ live Apple applications** in a product-based environment. Experienced in testing customized Android OS (**ColorOS, RealmeUI**), a lot of Android applications, and **Core Banking software**. Strong expertise in mobile QA strategy, test planning, API and automation testing, and cross-device validation. Known for **strong ownership, critical thinking**, and effective cross-functional collaboration to ensure on-time, high-quality releases.

WORK EXPERIENCE

APPNAP Technologies Ltd

2023 - PRESENT

Product-based company with 30+ live Apple apps serving millions of users globally

SQA Engineer Level 3

- Projects I have worked on : [All Testing Projects at Appnap](#)
- Led end-to-end QA strategy and execution for **iOS and Web applications**, ensuring stable releases across devices, OS versions, browsers, and screen sizes.
- Owned **UI/UX quality validation** by reviewing **Figma designs** for layout, spacing, typography, color, animations, and interactions, reducing design-to-development gaps by **30-40%**.
- Defined and maintained **test plans, test cases, scenarios, and acceptance criteria**; reviewed **SRS, estimated QA effort and timelines**, and improved **test coverage** and release reliability.
- Executed and governed **Functional, Regression, Smoke, Sanity, UAT, Compatibility, Load, and API testing**, identifying critical risks early and reducing production defects by **25%+**.
- Led **backend admin panel testing** for iOS applications, **validating business logic**, workflows, role-based access, data consistency, and error handling.
- Owned **API quality for mobile and web platforms** through request/response validation, authentication, authorization, data integrity, and edge-case testing.
- Ensured consistent behavior and responsiveness through structured **cross-browser and cross-device testing** across Chrome, Firefox, Safari, and Edge.
- Led QA and **test automation for Amarpot, InnovationKit, and Robodoc**, automating critical flows using **Selenium + TestNG** and reducing manual regression effort.
- Drove defect management and quality risk mitigation through **Jira-based tracking, root cause analysis**, and close collaboration with Developers, PMs, Designers, and Analysts.
- **Mentored junior QA engineers** and reported quality metrics, risks, and release readiness to the Team Lead and CTO.

EDUCATION

- ❖ **BSc in Computer Engineering** (2019)
 - American International University- Bangladesh
 - CGPA - 3.09
- ❖ **HSC in Science (2014)**
 - Dhaka College
 - GPA - 5.00 (out of 5)
- ❖ **SSC in Science (2012)**
 - Motijheel Ideal School
 - GPA - 5.00 (out of 5)

EXTRA-CURRICULAR ACTIVITY

- Planning and Development Coordinator** (Committee Post) of **AIUB Community of Engineering (ACES)**
- I have received a **Leadership Awards** from ACES for my club activities.

PROJECT AND THESIS

- Project Title:** Vehicle License plate detection and parking system Automation based on Image Processing and Arduino. Here is the [Thesis Report](#)
- Technology Used :** Java, Optical Character Recognition (OCR), Arduino, Proteus.
- Total Number of Members : 4

LANGUAGES

- English (Fluent)
- Bangla (Fluent)

LEADS Corporation Limited

Biggest Client-based software company delivering core banking solution in Bangladesh

Software Test Engineer

- Projects I have worked on :** Bankultimus, Xchecker, FSIBL Cloud, Cheqemate
- Collaborates with the development team for process improvements.
- Participates in the solution design process, including requirements gathering and analysis.
- Learns business processes and tests software solutions
- Prepares automation test scripts using Selenium & JMeter.
- Develops test plans for product releases and writes release notes.
- Using Azure DevOps for bug tracking and project management
- Engages in Agile culture through regular meetings like Scrum, Backlog, Sprint, Review, and Retro meetings

OPPO & REALME Bangladesh

2020-2022

Leading Chinese multinational smartphone manufacturers serving 600M+ users globally

R&D Engineer, QA

- Projects I have worked on :** ColorOS , realmeUI , Otrans, Camera , Music , Settings etc.
- Execute Field Test cases and prepare Field Test reports. Summarize Field Test bugs, update the FT working process, and plan
- Quick response to market feedback issues, test and verify the problem to the customers, push the issues being fixed on time to the China HQ developer
- Perform tests according to the test specifications and test plan of the smartphone operating system. Report bugs in WebRTC and ALM System
- Bug reports, reproduce and verify, analyze and track the bugs in Bug tracking tools, keep efficient communications with other testers and development engineers to solve found bugs

IMPORTANT PROJECTS & RESPONSIBILITIES

Oppo - ColorOS

Customized Mobile OS | 600M+ Global Users

- Functional, non-functional & UI testing for system apps (Camera, Music, Photos)
- Network, Field & NRT testing across devices
- Test case design, execution & documentation (manual & automated)
- Third-party app validation and release testing
- Supported multiple global OS releases (2020-2022)

BankUltimus

Core Banking Software - Bangladesh

- Manual testing of General Banking & Treasury modules
- Scrum Master (GB team) - sprint coordination & delivery
- End-to-end UAT & beta testing at client premises
- Supported live production deployment

Device Tracker

iOS IoT Tracking Application | 37K Ratings

- Requirement analysis & test case design
- Manual functional testing & API testing (Postman)
- Load testing (JMeter)
- Apple App Review compliance & risk analysis

Walkie Talkie Intercom App

iOS Communication App

- SRS & requirement analysis; test case creation (QASE)
- Manual functional, regression & smoke testing
- Scenario-based testing identifies critical defects
- Logged & tracked 342+ issues in Jira
- Beta testing via TestFlight (staging → production)

Realme UI

Customized Android UI | 35M+ Users

- Requirement analysis & localization testing (Otrans - Bangla)
- Functional, non-functional & UI testing for OS features
- IoT testing (Realme Watch, Buds)
- Release validation across multiple builds (2021-2022)

Heart Rate Monitor

iOS Health Application

- Requirement analysis, test scenarios & mind mapping
- Manual testing with large data validation
- API testing via Postman
- Risk analysis aligned with Apple guidelines
